SANDEEP KRISHNAN P

Chennai, India | +91 93459 75796 | sandeepskr008@gmail.com | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

MCA 2025 graduate (CGPA 8.63) with hands-on frontend development experience in React.js, JavaScript (ES6+), Redux, and REST API integration. Built and shipped full CRUD web applications with modular component architecture, client-side routing, and responsive UIs. Trained in MERN stack development through Acciojob. Published researcher (IRJMETS, Impact Factor 8.187). Looking to bring strong fundamentals and fast execution to a frontend/product engineering team.

TECHNICAL SKILLS

Languages & Core: JavaScript (ES6+), HTML5, CSS3

Frontend: React.js, Redux, Context API, React Router (react-router-dom), Bootstrap, Responsive Design, Vite

APIs & Database: REST API Integration, MongoDB, SQL

Tools & Platforms: Git, GitHub, VS Code, Vercel

EXPERIENCE

Web Development Intern | Unified Mentor *May 2024 – Jun 2024*

- Built reusable, modular JavaScript components across multiple pages, reducing code duplication by ~30%; wrote clean, maintainable, and well-documented code.
- Enhanced UI responsiveness through CSS and DOM optimizations; debugged and optimized existing features, improving performance and user experience.
- Collaborated with the team via Git (branching, pull requests, code reviews) in a fast-paced development environment.

PROJECTS & RESEARCH

SkyTonight — Real-Time 3D Astronomy Dashboard *React · Vite · Three.js (react-three-fiber) · Tailwind CSS · Vercel Serverless*
Live Demo | GitHub

- Built a real-time astronomical dashboard with an interactive 3D telescope view (React Three Fiber) that renders live planetary positions, moon phases, and altitude/azimuth data for all 8 planets based on the user's GPS coordinates or city search — no hardcoded data.
- Integrated multiple live data sources (Astronomy Engine, SunCalc, NASA APOD, N2YO ISS tracking, Open-Meteo geocoding) through Vercel Serverless Functions to securely proxy API keys and requests.
- Shipped an AR mode for mobile (device orientation-based sky alignment) and an AI-driven constellation storyteller feature; deployed and hosted live on Vercel.

Sign Language Recognition System (IoT + ML) *ESP32-CAM · TensorFlow Lite · CNN · OpenCV*

- Built an end-to-end real-time ASL gesture recognition system from hardware integration to model deployment, achieving ~85% on-device accuracy (TinyML) and ~95% via edge-server inference.
- Published in IRJMETS (Vol. 07, Issue 06, June 2025; Impact Factor 8.187) — demonstrates ability to take full ownership of a complex technical problem and deliver results.

EDUCATION

Master of Computer Applications (MCA) — CGPA: 8.63 / 10 *2023 – 2025*
Dr. M.G.R. Educational and Research Institute, Chennai | 2025 Graduate

Bachelor of Computer Applications (BCA) — CGPA: 8.0 / 10 *2020 – 2023*
Vel Tech Ranga Sanku Arts and Sciences College

CERTIFICATIONS & PUBLICATIONS

- NPTEL — Database Management Systems (Relational design, normalisation, SQL) — IIT/NIT Certified
- MERN Stack Development Training — Acciojob, 2025
- "Hand Gesture Recognition System Using IoT" — IRJMETS, Vol. 07, Issue 06, June 2025 | Impact Factor 8.187
